MSG

Kings Buffet prides itself on listening to its customers' concerns, preferences and health concerns. Monosodium Glutamate (MSG) is both a natural occurring by-product and synthetic flavour enhancer and preservative used by many manufacturers and food establishments.

Many people consider MSG to be a trigger for food allergies. Kings Buffet has made an effort not to use MSG. However, some fresh, frozen and pre-prepared products that we purchase (like bacon, sausages, salad dressings and base mixes) have or may have MSG.

Kings Buffet Group regularly updates our information about this and other related issues. We have learned that many foods, including fresh vegetables such as green peppers and mushrooms contain naturally occurring amounts of MSG and that any statement regarding its presence, or lack thereof could be potentially in error.

We want to see you often so please, let management know if you have food allergies.
