

## What Time Is It, Mr. Wolf? (One Step Version)

1		Line up the students against one wall.
2		Show a flashcard. Elicit the vocabulary and have them take one step forward.
3		Show the flashcard again, or another flashcard that has been deemed "safe". Elicit the vocabulary again and have them take one more step forward.
4		After several repetitions or switching from "safe" card to "safe" card, show a "danger" card – a card that has been designated to elicit a certain response. In this case, it tells them to hurry back to the wall they started from. Depending on the maturity of the students you can catch them to eliminate them, catch them to help you the next round, etc. For young ones, it's best to just playfully chase them back.
